

# ***Greek diglossia in the 20th century: A historical corpus linguistics approach***

Georgia Fragaki & Dionysis Goutsos  
(University of Athens)

# Structure of the paper

- The questions of Greek diglossia
- Historical corpus linguistics and recent language change
- *Diachronic Corpus of Greek of the 20<sup>th</sup> century*
- Data and method
- Findings: Grammatical items in diachrony
- Findings: Text types
- Conclusions

# The questions of Greek diglossia I

“what is societally recognized as diglossia is not directly related to how actual people implement the relevant contrasts”  
(Daltas 1993: 348)

> *what actual people did in specific contexts*

(cf. Alexiou 1982: 156: “what is the actual spoken and written usage of Greek today”, Mackridge 2009: 29: “actual language used in Greece”)

# The questions of Greek diglossia II

*A series of unanswered questions:*

- how many language varieties?

Fergusonian diglossia: K (High) vs. D (Low)

Mirambel's (1937) five-part distinction for the first half of 20th c.:

- katharévousa
- 'mixed' (scientific and political texts, news reports)
- 'colloquial' (everyday urban, journalism, non-fiction)
- demotic (everyday rural, dialectal variation)
- 'hairy' (standardization attempted by demoticists)

# The questions of Greek diglossia II

- how many language varieties? (cont.)

Alexiou (1982: 162-163): "D and K [...] cannot be divided into two absolutely watertight compartments, each with a separate set of syntactic, morphological and lexical structures [...] [Mirambel's] categorisation suggests a fixed and static situation which is misleading [...] shades and fluctuations between katharevousa and demotic"

Kazazis (2001: 293): "the binary opposition between High and Low is merely a convenient fiction [...] the span between these putative opposites constitutes a continuum"

Holton (2002: 171): "many forms of K and many forms of D"

# The questions of Greek diglossia III

- what was the range of registers?

Mackridge (2009: 29): "actual language used in Greece covered a continuum of linguistic registers ranging from 'pure' demotic to 'extreme' katharevousa, with hybrid varieties in between".

Holton (2002: 171): "K was the language of officialdom, the law, science and much of the educational system; it also had a considerable influence on journalism and the broadcast media. D was the language of oral communication, informal writing, poetry and novels".

# The questions of Greek diglossia IV

- is it a question of spoken vs. written?

Horrocks (2010: 459): "the written styles of the early 20th century were just too remote from ordinary speech to be learned effectively by the majority".

Mackridge (2004): "a fundamental misunderstanding of Greek diglossia, which has usually been presented as a conflict between spoken and written usage"

Petrounias (1978: 201): "common dialect evolved in the 19th c. which was used both in oral and written communication" (Pre-Common Modern Greek)

# The questions of Greek diglossia V

- when did changes happen?

Mackridge (2010: 566): "By 1900 the use of Ancient Greek had completely died out except as a scholarly exercise".

Mackridge (2009: 313): "In poetry and fiction written from the 1950s onwards [...] the literary language became more standardized [...] The language question had long been solved in literature, which waited for other discourses to catch up".

# The questions of Greek diglossia VI

- how did the public influence the private?

Hudson (2002): sociological (contextual) vs. grammatical (linguistic) aspects of diglossia

Daltas (1993: 341-342): "Ferguson's paradigm should be taken to be about the public aspect of diglossia as opposed to the private, about the legal system and not about the way people respond to it in actual life, though the former influences the latter in complex, dynamic ways".

# The questions of Greek diglossia VII

*Lack of evidence from use:*

Goutsos et al. (1994: 216): "arguments on linguistic issues are still based on an extremely small amount of data"

Iordanidou (2002a, b): "lack of backup from corpora"

> development of a diachronic corpus of Greek

# Historical corpus linguistics and recent language change I

- Development of diachronic corpora e.g. *Helsinki Corpus* (1,5 m., 730-1710), *COHA* (400 m., 1810-2009)
- Corpus "families" e.g. *Lancaster-Oslo-Bergen Corpus* (including BLOB-1931: 1928-1934, LOB:1961 and F-LOB: 1991)
- Synchronic, monitor corpora e.g. *BNC* (1960-now)

## *Phenomena studied:*

- vocabulary changes (Baker 2011)
- grammatical change (Leech et al. 2009)
- morphology (Baayen & Renouf 1996, Fischer 1998, Duguid 2010)
- phraseology (Davies 2012)
- cultural changes (Baker 2010, Marchi 2010, Partington 2012).

# Historical corpus linguistics and recent language change II

*Historical corpus linguistics: a convergence of disciplines:*

- historical sociolinguistics (Romaine 1982, Hernandez-Campoy & Conde-Silvestre 2012, Nevalainen & Raumolin-Brunberg 2003)
  - historical pragmatics (Jucker 1995, Jucker & Taavitsainen 2010)
  - grammaticalisation (Hopper & Traugott 1993/2003)
  - corpus linguistics on recent language change (Mair 2009)
- 
- A variationist view of language change (Milroy 1992: 123)
  - Attention “to the role played by textual and discourse factors across the centuries” (Rissanen et al. 1997a: v, 1997b: v)

# *Diachronic Corpus of Greek of the 20<sup>th</sup> century*

Research project “Aristeia I” (Excellence)

Aims:

- a) to examine the issues involved in the compilation of a diachronic corpus of Greek, including the availability of data/text types and representativeness
- b) to collect data for a diachronic corpus of Greek of the 20th century; to complement the existing *Corpus of Greek Texts* (1990-2010)
- c) to analyze the corpus with a view to drawing basic conclusions on linguistic change**

# Data and method I

Selection of data from *GreekCorpus20*:

<b>Genres</b>	<b>Text types</b>	<b>Number of words</b>
Spoken news	Newsreels	78,441
Public speeches	Parliament, Academic, Other	339,194
Conversation	Film scripts	208,206
Literature	Novels, Short stories, Poetry, Drama	1,086,687
Academic	Humanities, Social/Finance, Science	1,044,200
Popularized	Non-fiction	285,252
Private	Letters	178,720
<i>TOTAL</i>		<b>3,220,700</b>

## Data and method II

Raw and normalised (per 10.000 words) frequencies of seven grammatical items: *ἵνα* and the pairs: *ποῖος* vs. *ποιός/ποιος*, *διά* vs. *γιά/για*, *εἰς* vs. *σέ/σε*, (incl. variants e.g. *δί', γί', σ', στ\**)

- seven text types: emphasis on *speech-like* (private letters), *speech-based* (public speeches) and *speech-purposed* (films, drama, newsreels) text types (cf. Culpeper & Kytö 2010)
- data from nine decades (1900-1989)

# Grammatical items in diachrony I

# Grammatical items in diachrony II

*iva*

# Grammatical items in diachrony III

# Grammatical items in diachrony IV

# Grammatical items in diachrony V

# Text types I

Newsreels

# Text types II

Speeches

# Text types III

Films

# Text types IV

Academic

# Text types V

## Literature

# Text types VI

Private letters

# Conclusions I

*a variationist view of language change on the basis of the thoroughly attested role of frequency (Schneider 2004):*

U-curve of D variants in Greek diglossia

“Roller-coaster” pattern of K variants > stereotypical (in Labov’s sense), emblematic use

Formal vs. informal text types: conservative with sudden changes vs. gradual, “normal” language change

## Conclusions II

*Co-existing variants within text types/individual texts?*

- εις vs. σε in newsreels 1940s-1960s

## Conclusions III

### *Co-existing variants within text types/individual texts?*

- εις vs. σε in newsreels 1940s-1960s

Αι μηχανοκίνηται δυνάμεις του ελληνικού στρατού παρελαύνουν εις επιβλητικούς σχηματισμούς και εμπνέουν εις τας μυριάδας του λαού που τις παρακολουθεί το αίσθημα της ασφαλείας και της υπερηφανείας. [...] Χιλιάδες των θεατών χειροκροτούν και επευφημούν τους άνδρας αυτούς, οι οποίοι, με τους υπερόχους αγώνας των, έδωσαν στην Ελλάδα μας την μεγάλην και ωραίαν της νίκη (SRF01-1940-0002)

Μετά την άφιξιν εις την πόλιν, τα παιδιά δέχονται την ευλογίαν της Εκκλησίας. Προσφέρονται εις τα παιδιά διάφορα δώρα. Τα παιδάκια φθάνουν εις παιδόπολιν της Θεσσαλονίκης. Με τη χαρά ζωγραφισμένη στα πρόσωπά των παίζουν με τα δώρα που τους προσεφέρθησαν [...]. (SRF01-1950-0019)

Στον αερολιμένα του Ελληνικού συνεχίζεται με εντατικότατο ρυθμό στα πλαίσια του Τεχνικού Προγράμματος του 1969 η ανέγερσις νέων κτηριακών εγκαταστάσεων [...] Στο Τεχνικό Πρόγραμμα του 1969 προβλέπεται [...] δια της χρησιμοποίησεως ραντάρ εις τον έλεγχον της εναερίου κυκλοφορίας. [...] να ανταποκρίνεται ανέτως εις τας υποχρεώσεις του ως διεθνούς αεροπορικού κόμβου και εις τας ανάγκας διακινήσεως εμπορευμάτων και επιβατών (SRF01-1960-0050)

## Conclusions IV

*Co-existing variants within text types/individual texts?*

- εις vs. σε in private letters 1900s-1920s:

only 4% have both types > individual preference

- διά vs. για in literature 1900s-1910s:

most texts have both types > stylistic device:

Μία εξ αυτών κατελήφθη υπό σπασμωδικού ακαταβλήτου γέλωτος και ενώ δια της μιας χειρός εκράτει τα στήθη της, δια της άλλης εκτύπα τον ώμον της Λενιάς [...] συζητούντας και λύοντας τας διαφοράς των ενώπιον των προεστών, "για να παίρνη πράξι" [...] Ήτο τότε πολύ μικρός· επειδή δε κάθε φορά εζήτει να τον σηκώνουν για να παίξη την καμπάνα, αυτός κατ' ουδένα λόγον να πλησιάση άλλους ανθρώπους. Ούτε για να μεταλάβη δεν έστεργε να καταιβή στο χωριό. [...] Ο Μανώλης εγέλασεν, αλλ' εγέλασε μάλλον δια την μωρίαν εκείνου του νέου (WFB08-1910-0004)

# Conclusions V

Indications about the questions of diglossia:

- spoken vs. written?
- when did changes happen?
- how did the public influence the private?

A full-scale investigation of variants is expected to contribute to

- > an understanding of the range of registers and language varieties
- > an informed view on standardisation
